

Ahmed Mahmoud Hassan

Flutter Developer | Dart | Cross-Platform iOS & Android

ahmedrosea20@gmail.com • +20 112-871-3021 • Giza, Egypt • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Flutter Developer with 1+ years of experience delivering high-performance, cross-platform mobile applications for iOS and Android using Flutter and Dart. Track record across enterprise, e-commerce, fintech, and travel domains. Proficient in Clean Architecture, MVVM, RESTful API integration, Firebase platform services, and state management using Bloc and Provider.

WORK EXPERIENCE

Flutter Developer | The Arab Contractors

Mar 2025 – Present | Cairo, Egypt

- Architecting and maintaining 3 cross-platform Flutter apps that replaced paper-based workflows across 4 departments, reducing manual processing time by ~60%.
- Delivering production releases on 4–8 week agile cycles; collaborating with stakeholders to define requirements and drive iterative improvements.
- Integrating RESTful APIs with Firebase Authentication, Firestore, and Cloud Storage for real-time sync, offline support, and role-based access control.
- Enforcing Clean Architecture and MVVM across all codebases using Bloc/Cubit, reducing widget rebuilds and improving frame rendering on low-end Android devices.

Flutter Developer | Easy Pro Code

Jan 2023 – Mar 2023 | Cairo, Egypt

- Contributed to 4 cross-platform mobile application projects specializing in Flutter UI development, REST API integration, and Bloc state management.
- Improved app startup time and scroll performance by restructuring widget trees, applying const widget constructors, and lazy-loading data-intensive screens.
- Consistently met sprint deadlines through agile ceremonies — planning, standups, and code reviews — without compromising code quality.

Freelance Flutter Developer | Self-Employed

Apr 2022 – Mar 2023 | Remote

- Designed and launched 2 client mobile applications end-to-end and upgraded 5+ third-party apps across e-commerce, fintech, and travel sectors, all on schedule.
- **Fantasy Sky (Travel App):** Built a flight, hotel, and car rental booking platform with VR destination previews, boosting user engagement and session duration.
- **Harith (Smart Wallet App):** Developed a fintech digital wallet for bill payments, transportation, and event ticketing; personally coded 90%+ of the production UI from design specs.

Flutter Developer Intern | HDS Technology

Apr 2022 – May 2022 | Dubai, UAE (Remote)

- Contributed to live project workflows, developing practical skills in Flutter UI, widget architecture, and REST API integration under senior developer mentorship.
- **Shoppable Cart (E-Commerce App):** Built a demo storefront with payment processing, live order tracking, and a responsive production-grade UI.

PROJECTS

Shop Deal

E-Commerce App — Personal Project | Jun–Jul 2024

- Delivered a complete e-commerce app with 6 modules — multi-method authentication (Phone, Facebook, Google Sign-In), smart search, cart, order tracking, and multi-gateway payments — in a single 4-week sprint.
- Architected with Clean Architecture + Bloc, integrating Firebase Authentication, Firestore, and third-party payment APIs into a seamless end-to-end purchase flow.

Book-Rental Platform

Graduation Project | Mar–Jun 2022

- Built a peer-to-peer book rental platform powered by Firebase Authentication, real-time Firestore, and a RESTful API layer.
- Served as the sole developer and owned the full mobile lifecycle — from requirements and UI/UX design through API integration, testing, and on-time delivery.

TECHNICAL SKILLS

Languages & Frameworks: Dart, Flutter (cross-platform iOS & Android mobile application development)

Architecture & Patterns: Clean Architecture, MVVM, Repository Pattern, Dependency Injection

State Management: Bloc, Cubit, Provider

APIs & Networking: RESTful APIs, Dio HTTP Client, JSON Serialization

Firebase Platform: Firebase Authentication, Firestore, Cloud Storage, Cloud Messaging (FCM)

Local Storage: SQLite via Sqflite, Hive, Shared Preferences

Version Control: Git, GitHub

Tools & Integrations: Google Maps SDK, Payment Gateway APIs, Push Notifications, App Localization, UI/UX Implementation

EDUCATION

Bachelor of Science in Computer Science

Benha University • Banha, Al-Qalyubia, Egypt • Dec 2022

CERTIFICATIONS

- **Deep Dive into Clean Architecture in Flutter** — Udemy — Tharwat Samy (Sep 2024)
- **Flutter Advanced: Bloc and MVVM Pattern** — Udemy — Tharwat Samy (Jun 2024)
- **Flutter Clean Architecture** — Udemy — Usama Elgendy (Oct 2022)
- **Flutter Advanced: Payment Gateway Integration** — Udemy — Mohamed Hamouda (Oct 2022)
- **Flutter Workshop: Dart, Widgets, REST APIs, and State Management** — Udemy — Mohammed El-Tohamy (Sep 2022)
